PHAEMA test programme

Nov 12, 2026 · @Stuart

How to use this programme

This programme tests every section of PHAEMA in about 12 working days, using the demonstration data in two fictional districts. Each test below is a set of instructions for a person to follow in PHAEMA: an ID, steps, the expected result and a Result column to fill in. Tests marked (IT) need someone who can type commands on the computer that runs PHAEMA.

Where to test. Either use the public test site at demo.phaema.co.uk, or install a private copy for your council with the installation guide in the code repository (`deploy/README.md`). On the public site, ask for sign-ins with **Request a test account** (the PHAEMA project sets them up), and note that all data is reset every 48 hours: run each section within a day, record results as you go, and do not rely on records surviving overnight. Tests that need an Administrator account, or that change other people's work (sections U, Y and Z), are best run on a private copy.

Test data. Load it with `python manage.py load_demo_data --reset` (an IT task). It holds 72 properties, 47 agreements, 56 cases, 22 repair jobs, 59 certificate requirements, 35 valuations and two service charge schedules. All names, addresses, numbers and documents are invented.

District	References	Good for testing
Exampleton	DM-E01, DM-S01 to DM-S11	Riverside Industrial Estate, Market Square shops, Town Hall, Enterprise Centre (leased in, sub-let), a confidential property, surplus school site
Northfield	DM-N01 to DM-N12	Business park, The Precinct shops, library and leisure centre (compliance), former bus depot (hazards, surplus), telecoms site, market hall (turnover rent), farm, Innovation Hub (leased in)

Agreements are DL-0001 to DL-0200 (Exampleton) and DL-0501 to DL-0531 (Northfield). Dates are set relative to the day you load the data, so reviews, breaks and certificates always fall due at a realistic mix of times. Reload before each test cycle so everyone starts from the same position.

Projects. Three fictional projects: PRJ-2026-001 (a development at Northfield Business Park), PRJ-2026-002 (a confidential depot site acquisition) and PRJ-2026-003 (a disposal of two surplus sites). Section PJ uses them.

Demonstration people. Surveyors Alex Morgan, Priya Shah, Owen Jones, Lena Chen and Rob Baker are supervised by Sam Hughes (Head of Estates); Jo Patel is a legal contributor. They cannot sign in. Use them to test assignment, approvals and My work, viewed as an administrator.

Test accounts. In Manage data, create one account per role for each tester, with a password: an Administrator, two Surveyors (one supervising the other), a Contributor and a Viewer. Give one Surveyor some properties as managing surveyor. Put every account in all five access areas to start with; section Z narrows them. Give every account its own email address. Administrators are asked to set up two-step sign-in the first time they sign in (test A9), so have an authenticator app ready on a phone. Tests A15 to A18 need single sign-on set up by IT against a Microsoft 365 (or other) test tenant; without one, run A14 only. Never use real people's details.

Before you start: switch on every module in Manage data, Module settings (rent ledger, service charges, maintenance, compliance, asset valuation). Some tests switch one off and back on.

Programme

Run the phases in order: later sections depend on the register, leases and cases working. Two testers can split each phase by section.

Days	Phase	Tests
1	Set-up and smoke test: load data, create accounts, sign in as each role, check every menu item opens	A, B
2–3	The register: properties, map, titles, parties, agreements, lease events and reminders	C, D, E, F
4–5	Casework: cases, approvals, heads of terms and 1954 Act, standards checks, document library, projects	G, H, I, J, PJ
6–7	Income: rent ledger and service charges	K, L
8–9	Buildings: maintenance, compliance and Golden Thread, asset valuation	M, N, O

Days	Phase	Tests
10	Data in and out: reports, imports and exports, open data, API, change log, settings	P, Q, R, S
11	Cross-cutting: accessibility, security and permissions, browsers and devices, performance, access areas and cover	T, U, V, W, Z
12	Hand over work (changes demo data, so run last and reset), retest fixed defects, run the automated suite, sign off	Y, X

Start when: the demo data loads without errors, every tester has their accounts, and the automated test suite passes (`python3 -m pytest`).

Finish when: every test has a result; no Critical or High defects are open; Medium defects have an agreed fix date or are accepted; the automated suite passes on the final build.

Recording results

In each test's Result column write **P** (pass), **F** (fail, with a defect number), **B** (blocked by another defect) or **N/A** (module not in use), plus your initials and the date.

Severity	Meaning	Example
Critical	Data lost or wrong, a security hole, or a whole section unusable	A Viewer can edit a lease; a rent charge is posted twice
High	A main task cannot be done, with no workaround	Cannot record a rent review outcome
Medium	A task works but wrongly or awkwardly, with a workaround	A report total is missing; a filter ignores one option
Low	Wording, layout or cosmetic	A typo; misaligned column

For each defect record the test ID, the page address, what you did, what you expected, what happened, a screenshot, and your browser. Raise it as an issue on GitHub (phaema/phaema-app) with the label `testing`, or in the defect log at the end of this document.

Tests A–D: access, dashboard, register and map

A. Sign-in and roles

ID	Test	Steps	Expected	Result
A1	Sign in and out	Sign in with each test account; select Sign out	Dashboard opens; the header shows your name and role; sign out returns to the sign-in page	
A2	Wrong password	Sign in with a wrong password	Clear error; no hint whether the username exists	
A3	Viewer is read-only	As Viewer, open a property, an agreement and a case	No edit buttons or forms; posting a change by URL is refused	
A4	Contributor	As Contributor, open a case	Can add notes, emails and documents; cannot move stages or decide	
A5	Surveyor	As Surveyor, change a property you manage, then one you do not	First saves; second is refused	
A6	Administrator	As Administrator, open Import, Manage data and Hand over work	All three open; other roles do not see these links	
A7	Pages need sign-in	Signed out, open a property address and an uploaded file address	Sent to sign-in; files are never served	
A8	Sign in with email	Sign in typing your email address in place of the username, then again in capital letters	Signs in both times; a wrong password gives the same error as A2	

ID	Test	Steps	Expected	Result
A9	Two-step set-up	Sign in with the Administrator test account for the first time; set up two-step sign-in with an authenticator app; note the recovery codes; sign out and in again	Asked to set it up before anything else; the next sign-in asks for a 6-digit code after the password	
A10	Two-step codes	Enter a wrong code five times; sign in again using a recovery code; try the same recovery code once more	Five wrong codes end the attempt; a recovery code works once only	
A11	Forgotten password	On the sign-in page select Forgotten your password?; enter your email address; open the emailed link and choose a new password; open the link again. Needs email set up on the server	The email names your username; the new password is saved; you are not signed in until you sign in yourself, with your code if you use two-step sign-in; the second use says the link has expired	
A12	Forgotten password, no account	Enter an address that has no sign-in, then the username of an account that is not Active	The same Check your email page each time; no email is sent	
A13	Change password	Select Change password in the menu: enter a wrong current password, then the right one with a new password of 12 or more characters	First refused; second saved; the new password signs you in	

ID	Test	Steps	Expected	Result
A14	Single sign-on is off unless set up	On a site with no single sign-on settings on the server, open the sign-in page. As an Administrator, tick Sign in with the council's own accounts in Module settings and open the sign-in page again	No Sign in with Microsoft button either time; signing in with a password works as before	
A15	Sign in with a council account	Needs single sign-on set up by IT (docs/single-sign-on.md); skip A15 to A18 if it is not. Give a test account the email address of a Microsoft account. Select Sign in with Microsoft and sign in there	You arrive signed in as that test account, with no PHAEMA two-step code asked for; in Manage data, Users, the person shows a Council sign-in box; the change log records the link	
A16	Council account with no PHAEMA account	Select Sign in with Microsoft and sign in with a Microsoft account whose email address is on no PHAEMA account	Returned to the sign-in page with a message that there is no PHAEMA account for that address; not signed in; no account created	
A17	Who can still use a PHAEMA password	After A15, sign out and try that person's PHAEMA password. Try the password of a Surveyor who has never used the button, and of an Administrator who has. Then set Who can still sign in with a PHAEMA password to Anyone and try the first person again	First refused; the unlinked Surveyor and the Administrator sign in; after the change the first person's password works	

ID	Test	Steps	Expected	Result
A18	Roles from council groups	In Manage data, Sign-in group mappings, add a mapping giving the Surveyors role and the Finance access area to a Microsoft group the A15 person is in. Sign in with Microsoft. Then have IT remove the person from the group and sign in again	After the first sign-in the person is a Surveyor in Finance; after the second both are gone; a role set by hand that no mapping names is unchanged; the change log shows each change	

B. Dashboard, My work and page settings

ID	Test	Steps	Expected	Result
B1	Landing tab	Sign in as Surveyor, then as Viewer	Surveyor lands on My work; Viewer on Whole estate	
B2	Remember tab	As Surveyor choose Whole estate, sign out and in	Whole estate opens	
B3	Whole estate figures	Check property count, vacant units, rent roll and lease event counts against the Properties and Events lists	Figures agree; each number links to the matching filtered list	
B4	My work content	As Administrator, Show the work of Lena Chen	Needs attention, Coming up (90 days), open cases, properties (Northfield Business Park and others), repairs, compliance and arrears panels	
B5	Viewing others	As a Surveyor, add ?view=mine&person= with another surveyor's number	Refused unless you supervise them	
B6	Hide and show panels	Hide two panels, reload; use Hide all and Show all	Hidden panels stay hidden after reload; buttons toggle all	

ID	Test	Steps	Expected	Result
B7	Styles	Switch Style to Clear, then Compact, then Classic	Page changes look; choice kept across pages	
B8	Themes and text size	Try Dark, High contrast and Largest text with the Clear style	All text readable; nothing overlaps or is cut off	
B9	Panels without JavaScript	Turn JavaScript off and open the dashboard	Every panel is open and readable	
B10	Tenancies at will	Whole estate: select the highlighted tenancies at will in place figure	Opens the agreements list showing only live tenancies at will (DL-0040 is one); the number listed matches the figure	
B11	Expiries by 1954 Act status	Under Lease events, compare the lease expiries row with the Contracted in and Contracted out rows beneath it; select each number	The rows beneath add up to the lease expiries row; each number opens the matching events	
B12	Time is of the essence	Under Lease events, select the links in the red Time is of the essence notice	Lists the open rent reviews where time is of the essence, including DL-0001; the counts match the notice	
B13	Documents to review	Under Lease events, select the numbers on the Lease documents to review row	Opens Documents to review with the overdue or coming review dates; each document links to its agreement	

C. Properties

ID	Test	Steps	Expected	Result
C1	List and filters	Properties: filter by type Unit, occupation Vacant, surveyor, and search "Precinct"	Results match every filter; counts shown	
C2	Hierarchy	Open DM-N01 Northfield Business Park	Shows its two blocks and ten units; breadcrumbs work both ways	
C3	Floor areas	Open DM-E01-B01	Area breakdown adds up the units; measurement basis shown	
C4	Photos	Open DM-N01-U04 and click each thumbnail	Main photo and caption change; works by keyboard	
C5	Site hazards	Open DM-N06 Former bus depot	Hazard warning shown at the top	
C6	Add and edit	As Administrator add a property under DM-N02, then edit it	Saved; appears in the list and in the change log	
C7	Confidential site	Find DM-S09	Marked excluded from open data	
C8	Portfolios	As Administrator, Manage data, Portfolios: add one; choose it on a property in Edit this property; filter the register by it; try to delete it	The property shows the portfolio; the filter and the Portfolio column work; a portfolio with properties in it cannot be deleted	

ID	Test	Steps	Expected	Result
C9	Estate strategy and purpose review	Edit a property: enter an Estate strategy section and a Holding purpose review date in the past; filter the register to purpose reviews that are overdue	Both are shown on the property; the property appears under the overdue filter	
C10	Site and buildings	Open DM-N01 Northfield Business Park, then its Hangar block (DM-N01-B01), then a unit with nothing recorded	The estate shows location, site area 8.36 ha (83,600 m²), 96 parking spaces and services; the block shows steel portal frame, 1 storey, roof, windows and solar panels 150 kWp; the unit says nothing is recorded yet	
C11	Record site and building details	As a Surveyor, edit a property you manage: enter 2500 in Site area (m²), choose a construction, roof type and covering, set electricity to Three-phase, and enter a solar capacity with Solar panels left blank. Save, then set Solar panels to Yes and save again	First save refused with a message about solar panels; second saved; the page shows 0.25 ha (2,500 m²) and the details; the change is in History	
C12	Floor plans	In Edit this property, under Floor plans, add a PDF plan and an AutoCAD drawing (.dwg), each with a title. Try to add a Word file. As a Surveyor, open the edit page of a property you do not manage	Both plans listed on the property page with their type; the PDF opens in PHAEMA's reader and the drawing downloads; the Word file is refused; the other property cannot be changed	

ID	Test	Steps	Expected	Result
C13	Property report	On DM-N01 select Property report. Read it, select Print, then Download as Word	Sections for the property, location, description (each block in turn), floor areas with the parts, floor plans, title, tenancies and other agreements with their terms, and cases in hand; ended agreements and closed cases are left out; Not yet recorded lists Floor plans; the Word file opens with the same content	
C14	Initial valuation report	Open the case Valuation of Northfield Business Park at 31 March 2027 and select Initial valuation report. Then open a consent case	The report is headed Initial valuation report with the case reference; that case is not in Cases in hand but the park's other open cases are; the consent case has no such link	
C15	Add several floor plans and photos by dragging	As a Surveyor, open a property you manage and open Add floor plans or photos. Drag two PDF plans onto the Floor plans box and select Add the plans. Drag three photos (JPEG or PNG) onto the Photos box and select Add the photos	The plans are listed under Floor plans, titled with their file names; the photos appear in the gallery, captioned with their file names; both are recorded in the change log	

D. Map and titles

ID	Test	Steps	Expected	Result
D1	Map loads	Open Map; zoom to Exampleton, then Northfield	Boundaries shown for both districts; legend matches colours	
D2	Select on map	Click a boundary	Property name and link shown	
D3	Draw from parcels	On DM-S06 join the two registered parcels into one boundary	Boundary saved; site area recalculated	
D4	Titles	Open title ZZ100014 (DM-N06) and the unregistered title for DM-N05	Title class (qualified, unregistered), deeds location and linked properties shown	
D5	Title documents	Open the official copy on ZZ100001	PDF opens; only signed-in users can open it	

Tests E–J: agreements and casework

E. Parties and agreements

ID	Test	Steps	Expected	Result
E1	Parties	Open Northfield Group plc	Shows it guarantees DL-0503; contact details and finance reference shown	
E2	Agreement types	Open DL-0505 (lease), DL-0523 (licence), DL-0525 (farm business tenancy), DL-0522 (telecoms)	Each shows the right type, term, rent and frequency	
E3	Leased in	Open DL-0530 and DL-0100	Shown as held by the council; rent counted as paid, not received	

ID	Test	Steps	Expected	Result
E4	Rent schedule	Open DL-0034	First-year concession then full rent; current rent correct for today	
E5	Breaks	Open DL-0502 and DL-0519	Break date, who can break, notice period and last notice date shown	
E6	Holding over	Open DL-0507	Status Holding over; appears in the holding-over report	
E7	New agreement	As Surveyor create a lease of DM-N01-U04 with a 5-year review and a break	Saved; review, break and expiry events created and assigned to the managing surveyor	
E8	Deposit	Open DL-0502	Deposit amount, where it is held and who gets the interest shown	
E9	Agreement flags	Agreements: filter by each flag in turn (time is of the essence, rent demands on hold, arrears passed to debt collectors or legal, has its own billing contact)	DL-0001 (essence, billing contact), DL-0031 (on hold) and DL-0024 (arrears passed on) appear under the right flags, and each is tagged on its own page	
E10	Billing contact	Open DL-0001; then on an agreement with no billing contact select Edit this agreement and add only a billing email	DL-0001 shows its own billing contact; the other shows the tenant's main contact with your email in place of theirs	
E11	Document review date	On an agreement add a document with a date for review in the past	Listed on the agreement with its review date marked overdue; appears in Documents to review (B13)	

ID	Test	Steps	Expected	Result
E12	Tenant's insurance certificate	Open DL-0021; then an agreement where the tenant insures and no certificate is held, and select Start a case to get the tenant's insurance certificate	DL-0021 shows the certificate held; the other shows a warning; the new case is linked to the agreement and has its tasks	
E13	Add several documents to an agreement by dragging	As a Surveyor, open an agreement on a property you manage. Under Documents, drag two PDFs onto Add documents, choose Deed of variation as the type, and select File them. Try again with a Word file. Sign in as a Viewer and open the same agreement	Both PDFs are listed under Documents as deeds of variation, named after their files; the Word file is refused with a reason; the Viewer sees the documents but no Add documents box	

ID	Test	Steps	Expected	Result
E14	Read a lease in PHAEMA's PDF reader	Open an agreement that has a PDF under Documents and select the document. Move to the next page, type a page number, zoom in, select Fit width, then Rotate. Select a small page in the strip at the side, then select Pages to hide the strip and open the document again. Type a word that is in the lease into Find in this document and press Enter, then use the arrows. Select Download, then Print. Select the Back link. Repeat on a phone. Lastly, add a scanned PDF and a password-protected PDF and open each	The lease opens inside PHAEMA on its own page, named as it is on the agreement, with a link back to the agreement. Pages, zoom, fit and rotate work. The strip shows every page, outlines the current one and goes to the page selected; once hidden it stays hidden the next time; on a phone it starts hidden. Find highlights every match, says how many there are and moves between them. Download saves a copy with a recognisable name; Print opens the browser's own PDF reader in a new tab. Back returns to the agreement. On a phone the controls wrap and the document fills the width. The scan displays but Find reports Not found; the protected PDF shows a message and a download link	

F. Lease events and reminders

ID	Test	Steps	Expected	Result
F1	Events list	Events: filter by type, overdue, next 6 months, assigned to me	Correct events; overdue in red	
F2	Record a review	Settle an open rent review at a new rent	Event done; rent schedule gains the new rent from the review date	
F3	Lapsed breaks	Find a break date in the past	Shown as lapsed, never overdue	
F4	Reminders (IT)	Run `python manage.py send_reminders`	Emails list each surveyor's due events at the configured lead times	
F5	Calendar feed	Subscribe to your calendar link in a calendar app	Your events appear with correct dates	
F6	Estimated rental value	Open the rent review on DL-0001 and the lease expiry on DL-0004; change the estimated rental value on one; then open a break event	The estimated rental value is shown against the current rent and your change is saved; a break event has no estimated rental value box	
F7	Time of the essence on events	Edit an agreement and tick Time is of the essence in the rent review section; open Events filtered to rent reviews where time is of the essence; open My work for its surveyor	Its open rent review is listed and tagged, and marked on My work; the dashboard count (B12) rises by one	

G. Cases and approvals

ID	Test	Steps	Expected	Result
G1	Case list	Cases: filter by stage, owner, past target, waiting for approval	Correct cases; RAG tags match target dates	
G2	New consent case	Open a consent to assign on DL-0511; acknowledge; mark the application complete	Target date set from the application date (28 days); tasks created	
G3	Tasks	Tick tasks done; add your own task with a due date	Saved with who and when; overdue tasks show on My work	
G4	Correspondence	Log a letter; file an email (.eml) with an attachment	Both in the timeline; attachment stored on the case	
G5	Confidential notes	Add a confidential note; view as Contributor	Contributor sees a count of hidden notes, not the text	
G6	Approval gate	Try to move a consent case to Decision	Replaced by Ask for approval	
G7	Ask, return and approve	Ask for approval; as supervisor Return without comments, then with; ask again; Approve	Returning needs comments; emails sent each way; history kept on the case	
G8	No self-approval	As the requester, post an approval	Refused	
G9	Reassign	As Administrator send a waiting approval to someone else	New approver sees it on My work	
G10	Decide and close	Record Granted with conditions, then close	Conditions need written reasons; case closes	

ID	Test	Steps	Expected	Result
G11	Fee	Raise a case fee	Charge created on the rent ledger, linked to the case	
G12	Event cases	Open the case for an upcoming rent review	Linked to the lease event; closes when the event outcome is recorded	
G13	Site visit sheet for a site with several buildings	Open the case Valuation of Northfield Business Park at 31 March 2027 and select Site visit sheet	Four parts: The case, Before you visit (the HGV hazard on the roads and verges, the asbestos warning, the occupiers with contact names and phone numbers), The property, and On site. On site has a list for the visit as a whole, then a list each for the Hangar block and the Workshop block showing steel portal frame, the roof and the services beside the items	
G14	Site visit sheet for a consent, and a case with no property	Open a consent case on an agreement and select Site visit sheet. Then add a General enquiry case with no property or agreement and open it	The consent sheet names the tenant with their contact details and the agreement, has one checklist (no list per building) with items about the proposal, and has no Location, Title or Floor areas sections. The case with no property has no Site visit sheet link	

ID	Test	Steps	Expected	Result
G15	Sheet on a phone, printed and in Word	Open the G13 sheet on a phone. On a computer select Print and look at the preview, then Download as Word	On the phone everything is in one column with no sideways scrolling. The print has no menus or buttons, boxed tables and empty boxes to write in. The Word file opens with the same content and tick boxes	
G16	File several documents and emails by dragging	On a computer, open a case you own. Drag two PDFs and a saved email (.eml or .msg) from a folder onto the File documents and emails box, leave Emails were as Received, and select File them. Then drag a file of a type PHAEMA does not accept (such as a .zip) with another PDF and file them. Lastly, in Add a document, drag one PDF onto Choose file	The box shows 3 files chosen, then the message Filed on this case: 2 documents and 1 email. The documents are named after their files; the email appears with its sender, date and subject. The second time the PDF is filed and the other file is listed as not filed. The single chooser shows the dropped file's name	

H. Heads of terms and the 1954 Act

ID	Test	Steps	Expected	Result
H1	Heads of terms	Open the Studio 2 new letting case (Northfield); fill all 16 items	Counter rises to 16 of 16; current lease terms shown as hints for renewals	

ID	Test	Steps	Expected	Result
H2	Unrepresented tenant	Mark the tenant unrepresented without a Code date	Decision blocked until the RICS Code date is given	
H3	Section 25 notice	On the Unit 7 renewal case check the notice dates	Court deadline and counter-notice dates calculated; ground (f) opposition shown	
H4	Section 26 request	On Brookside Joinery's renewal case change the date served	Deadlines recalculate; warnings for impossible dates	

I. Standards checks on cases

ID	Test	Steps	Expected	Result
I1	Conflict of interest	Try to ask for approval before confirming conflicts; then declare one with details	Blocked first; declaration saved and shown to the approver	
I2	Dilapidations	Open the Unit 4 dilapidations case; enter a settlement	Schedule £68,500, response £31,000; gap to the schedule shown	
I3	MEES warning	Open a new letting case for DM-N01-U04 (EPC G) and DM-N12-U02 (no EPC)	Warning about the rating, and about the missing EPC	
I4	Before you visit	Open a case, job and valuation on DM-N04 Leisure Centre	Panel lists the pool plant room hazard, asbestos information and open actions	

J. Document library

ID	Test	Steps	Expected	Result
J1	Browse	Documents: browse by category	All templates listed with their legal source	

ID	Test	Steps	Expected	Result
J2	Fill from a case	From a consent case create a consent approval letter	Tenant, premises, lease date and case reference filled in; gaps highlighted	
J3	Export to Word	Download the letter as Word	Opens in Word with letterhead, page numbers; unfilled items highlighted yellow	
J4	Prescribed forms	Create a section 25 notice	Particulars only, with a warning to use the prescribed form	
J5	Add a template	As Administrator add a new template with merge fields	Available to surveyors; fields fill correctly	

Tests K–O: income and buildings

K. Rent ledger

ID	Test	Steps	Expected	Result
K1	Rent account	Open DL-0506 Northfield Joinery Workshop	Monthly charges, receipts and running balance; last two months unpaid	
K2	Arrears	Rents, Arrears	DL-0506, DL-0512, DL-0518 and Exampleton's DL-0016 and DL-0024 listed, aged into 1–30, 31–60, 61–90 and 90+ days	
K3	Part payment	Open DL-0514 Northfield Bakery	Latest charge part paid (about 40%)	
K4	Demand run	Issue the next quarter's demands; issue it again	Charges created once only, with VAT where chargeable	
K5	Credit note	Credit £100 on a charge, then try without a reason	Credit created with a reason; refused without one	

ID	Test	Steps	Expected	Result
K6	Receipts import	Import a CSV of receipts with one bad reference	Good rows matched to invoices; bad row reported, nothing half-loaded	
K7	Finance export	Export charges to finance; export again	File has new charges only; exported charges are locked	
K8	Module off	Switch the rent ledger off; reopen Rents	Section says it is switched off; menu link gone	
K9	Demands on hold	Start a demand run for a period that includes DL-0031	The preview names DL-0031 as on hold; no rent or service charge is raised for it	
K10	Take a hold off	In Edit this agreement untick Rent demands on hold on DL-0031; run the same dates again	DL-0031 is charged once; no other agreement is charged twice	
K11	Arrears passed on	Rents, Arrears: filter to arrears passed to debt collectors, then to those not passed on; download the list	DL-0024 is tagged with the date and reference; each filter shows the right agreements; the download has the same rows and the referral columns	
K12	Billing contact on demands	Open the rent account and a statement for DL-0001; export its charges to finance	The account and statement show the billing contact; the export uses the billing address and ends with Billing contact and Billing email columns	

L. Service charges

ID	Test	Steps	Expected	Result
L1	Schedules	Service charges: open both schedules	Riverside (6 leases) and Northfield Business Park (8 leases); empty units borne by the council	

ID	Test	Steps	Expected	Result
L2	Apportionment	Open the Northfield apportionment matrix	Shares by floor area add to 100%; DL-0509 cap applied, excess borne by the council	
L3	Budget and demands	Approve next year's budget; issue the budget	Quarterly on-account demands appear on each tenant's rent account	
L4	Spending	Add a cost; import spending with Category and Tenants agreed columns	Costs appear against headings; budget v actual updates	
L5	Improvements and BSA defects	Save a recoverable improvement without tenants' agreement; mark a cost as a Building Safety Act defect	First refused; defect forced to not recoverable	
L6	Late issue	Record statements as issued after the four-month deadline, without and with a reason	Reason required; printed on the statement with an apology	
L7	Year end	Reconcile last year and open a tenant statement	Balancing charge or credit per tenant; certified-by shown	
L8	Deadlines (IT)	Run the weekly deadline email	Administrators get budgets and statements due in 60 days	

M. Maintenance

ID	Test	Steps	Expected	Result
M1	Report a repair	Report a job on DM-N05 Community Hall	Target date set from priority; responsibility suggested from the lease	
M2	Emergency job	Open the pool hall ceiling job at DM-N04	Emergency, ordered, target today	

ID	Test	Steps	Expected	Result
M3	Works order approval	Open the roof lantern job (DM-N09, £14,800), waiting for Sam Hughes; as Administrator approve it, then issue the order	Order held until approved	
M4	Works order	Issue an order and download it	Order names the contractor, property, job, priority and target date	
M5	Complete and recharge	Complete the graffiti job on DM-N01-U06 and raise the recharge	Recharge invoice on the tenant's account	
M6	Tenant's repair	Open the shop front glass job at DM-N02-U06	Responsibility Tenant, with the lease reason	
M7	Planned maintenance	Planned: filter overdue and statutory	Leisure centre water temperatures and library emergency lighting overdue; jobs raised automatically when due	
M8	Components	Components: filter by building and surveyor; condition D	Library flat roof (D) listed with replacement cost	
M9	Contractors	Open Clearview Glazing Northfield	Insurance expiring within 30 days flagged	

N. Compliance and the Golden Thread

ID	Test	Steps	Expected	Result
N1	Overview	Compliance: filter to DM-N04, then to Owen Jones	Leisure centre: TM44 missing, emergency lighting expired, actions open on the FRA and EICR. Library (DM-N03): FRA expired, EICR unsatisfactory	
N2	Record a certificate	Upload a new emergency lighting certificate for DM-N04	Status turns Valid; expiry calculated from the inspection date	

ID	Test	Steps	Expected	Result
N3	Remedial actions	Open the DM-N04 fire risk assessment	One action open (escape route), one done; mark it done	
N4	EPC below E	Report EPC rated F or G	DM-N01-U04 (G), DM-N02-U07 (F) and DM-E01-U03 (F) listed	
N5	Golden Thread tier	Open DM-N03 building safety	Tier B, height, responsible person and who confirmed it	
N6	Building documents	Upload a new version of the DM-N03 asbestos register	Old version kept as superseded; Before you visit links the new one	

O. Asset valuation

ID	Test	Steps	Expected	Result
O1	Programme	Asset valuation: this year's programme	Every classified asset due this year listed, with assignee	
O2	Assign	Assign DM-N09 to the external valuer, and DM-N03 to Lena Chen	Assignee emailed; appears on their My work	
O3	Record and accept	Enter a fair value with land and buildings that do not add up; correct; accept as Administrator	Refused until they add up and the fair value level is set; accepted ones are locked	
O4	Indexation	Open DM-N04 (valued 2022)	Indexed value to the year end shown with the factor	
O5	Audit query	Answer the open audit query on the market hall, report it, then close	Statuses move to reported and closed; auditor's due date shown	
O6	Year-end schedule	Download the schedule for finance	Every asset, value, fair value level and indexed value	

Tests P–S: data in and out, administration

P. Reports

ID	Test	Steps	Expected	Result
P1	Ready-made reports	Run every ready-made report once	Each runs without error; module reports appear only when the module is on	
P2	Check figures	Run Rent roll, Lease expiries in 12 months, Certificates expired; compare with the records	Rows and totals agree with the source records	
P3	Build a report	New report on Leases: pick columns, number their order, filter rent at least £15,000 and expiry in the next 2 years, sort, show totals	Correct rows, column order and totals	
P4	Blank filter	Properties report: UPRN is blank	Properties without a UPRN only	
P5	Download	Download P3 as Excel and CSV	Same rows as the screen; every row, not just the first page	
P6	Share and copy	Share P3; as another Surveyor copy and change it	Colleague can run and copy, not edit the original	
P7	Filters on list pages	On components, compliance and planned maintenance, filter by building DM-N01 and by surveyor	Only records on that building, or that surveyor's properties	
P8	Lease documents report	New report on Lease documents: filter to a review date before today; download it	Lists the overdue documents from B13 with their agreement, type and review date	

ID	Test	Steps	Expected	Result
P9	New columns	In reports on Properties and on Leases add Portfolio, Estate strategy section, Holding purpose review date, Time is of the essence, Rent demands on hold and Estimated rental value	Each column is offered and is filled where the record has a value (for example DL-0001 and DL-0031)	
P10	Site and building columns	Build a property report with the columns Construction, Roof type, Roof covering, Electricity and Solar capacity kWp; filter Roof type to Flat; download to Excel	DM-N03 Northfield Library is listed with concrete frame and mastic asphalt; the business park blocks are not; the download has the same rows and columns	

Q. Imports and exports

ID	Test	Steps	Expected	Result
Q1	Templates	Import: download each template	Spreadsheet with headings, guidance and an example row	
Q2	Property import	Import five new properties including Site hazards; then the same file with one change	First adds five; second updates one; nothing duplicated	
Q3	Validation	Import a file with a missing reference, a bad date and an unknown surveyor	Every problem listed by row; nothing imported until fixed	
Q4	Leases and parties	Import parties, leases and breaks in one workbook	Records linked; events created	
Q5	Valuer's figures	Import returned valuation figures for two assets	Values recorded as received	
Q6	Components	Import a component list for DM-N03	Components appear with lifecycle dates	

R. Open data and API

ID	Test	Steps	Expected	Result
R1	Transparency Code list	Download the land and assets file as CSV, JSON and GeoJSON	Northfield and Exampleton assets with UPRN and grid reference; DM-S09 left out	
R2	Available property	Download available property	Vacant lettable units only, such as DM-N01-U04 and DM-N02-U03	
R3	API	Open API docs; call the properties endpoint signed in, then signed out	Data returned when signed in; refused when not	

S. Change log, settings and administration

ID	Test	Steps	Expected	Result
S1	Change log	Edit a lease rent; open Changes	Who, when, before and after values shown; filter by person works	
S2	Supervisors	Set a supervisor on a user record	Their approval requests go to that supervisor	
S3	Branding	Change the organisation name and brand colour	Header updates for everyone	
S4	Modules	Switch maintenance off and on	Menu, dashboard panels and reports follow the setting; no data lost	
S5	Case types	Change which stages need approval for one case type	New cases follow the new setting	
S6	Help pages	On a property, a case and the dashboard, select Help with this page; search Help for "hand over"	The matching help page opens with screenshots; search finds Users and roles	

ID	Test	Steps	Expected	Result
S7	Training courses	Help, Training courses; open the System administrator course and complete the Users module	Steps show highlighted screenshots, including Hand over work; the exercise answer (Sam Hughes) and the quiz are marked correctly; progress is kept after reloading	
S8	Two-step rule	In Manage data set two-step sign-in to required for everyone; sign in as a Viewer; set it back	The Viewer is asked to set up two-step sign-in before doing anything else	
S9	Test account requests	On a public test site only: signed out, select Request a test account and send the form; as Administrator open Manage data, Test account requests and choose Approve as surveyor	The person is emailed their username and a one-time link; after choosing a password they sign in as a Surveyor	
S10	Change a site visit sheet	As an Administrator, in Manage data, Case types, open Encroachment or trespass. Untick every part of the property information except Key facts. Add a checklist item: heading Fence, item Height of fence, answer Number or measurement. Add another: heading Fence, item Material, answer One of a list, list Timber, Wire, Hedge. Save, then open the sheet of the case Timber stored on the estate road verge. Sign in as a Surveyor and open the same sheet	The sheet shows only the key facts of the property; the new items appear under Fence with a blank to write in and three tick boxes; Before you visit is still there. The Administrator sees Change this sheet for all cases of this type; the Surveyor does not. The change is in the change log	

Tests PJ: projects

Run these on days 4–5 with casework. The demo data has three projects: PRJ-2026-001 Northfield Business Park phase 2 (a development led by Lena Chen), PRJ-2026-002 Depot site acquisition, Mill Lane (confidential, led by Rob Baker, with Jo Patel and Sam Hughes on the team) and PRJ-2026-003 disposal of surplus land at Oak Street and Lower Farm. Reload the demo data afterwards: PJ7 and PJ12 change it.

ID	Test	Steps	Expected	Result
PJ1	Start a project	As a Surveyor, Projects, Start a project; choose Acquisition, give a proposed site and title number	Created with the next PRJ reference, in Idea, confidential, with starter tasks	
PJ2	Who can start	As a Viewer, type `/projects/new/`	Refused	
PJ3	Confidential	As a Surveyor not on PRJ-2026-002's team, open Projects, a DM-N01 property page and Reports, Projects; type its address	It appears nowhere; the address shows page not found	
PJ4	Access log	As an Administrator, open PRJ-2026-002	Who has opened it lists each opening, including yours	
PJ5	Gateways	On your PJ1 project, record gateway 1 Approved, then gateway 2 Deferred, then Rejected	Moves to Business case; stays there; then Stopped with the reason	
PJ6	Milestone status	On PRJ-2026-001, set a milestone's target to yesterday	The project shows red, Milestone missed	
PJ7	Budget	On PRJ-2026-001, enter figures for a year with forecast above approved	Totals by financial year and "over budget" shown	
PJ8	Who sees the budget	Give a Surveyor test account only Estates, then only Finance; open PRJ-2026-001	Budget hidden with Estates only; shown and editable with Finance	

ID	Test	Steps	Expected	Result
PJ9	Spending import	As a finance officer, Import, Project spending, with a row for PRJ-2026-001 and a made-up budget line	The made-up line is rejected by name; a correct row updates the actual figure	
PJ10	Risks and linked work	Add a risk with likelihood 4 and impact 5; link an open case by reference	Score 20, High, listed first; the case page shows Part of project	
PJ11	Proposed site	On your PJ1 project, Draw the proposed site with one known INSPIRE ID and one made-up ID	The made-up ID is named and nothing changes; with known IDs only, the boundary shows on the map	
PJ12	Completion checklist	Open PRJ-2026-003; follow Record the disposal for DM-S06 and save a completion date and price	Checklist ticks that step itself; DM-S06 shows Disposed of and is gone from the open data download	
PJ13	Prefilled forms	Open PRJ-2026-002's checklist and select Add the property and Add the title	The forms open with the site address and title number filled in; nothing is saved until you save	
PJ14	Hand over	Hand over work for Rob Baker	Projects he leads, his team places, project tasks and risks are listed and can go to another Surveyor	
PJ15	My work and phone	Add a Surveyor test account to PRJ-2026-001's team and give it a milestone, then open My work as that account; then a project page at phone width	My projects and project milestones appear; the project page fits without sideways scrolling	

Tests T–Z: cross-cutting checks

Run these on a sample of pages: the dashboard, a property, an agreement, a case, a job, a report and an import.

T. Accessibility (WCAG 2.2 AA)

ID	Test	Steps	Expected	Result
T1	Keyboard only	Use Tab, Shift+Tab, Enter and Space only	Every link, button, menu and panel reachable; yellow focus always visible; Escape closes header menus	
T2	Screen reader	NVDA (Windows) or VoiceOver (Mac): read a case and the dashboard	Headings in order; panel buttons say expanded or collapsed; tables read with headers	
T3	Zoom and reflow	Zoom to 400% at 1280px wide	No sideways scrolling except wide tables, which scroll on their own	
T4	Colour	High contrast theme; and a colour-blindness simulator on the Clear style	Nothing relies on colour alone; tags and panels carry words	
T5	Forms and errors	Submit a lease form with errors	Error summary at the top links to each field	
T6	Automated check	Run axe DevTools or WAVE on the sample pages, at desktop width and at phone width (390px)	No serious or critical issues, including target size	
T7	Scrolling tables by keyboard	At phone width open Properties; Tab to the property table and use the arrow keys	The table box takes focus with a yellow outline and scrolls sideways; a screen reader announces it by the table's heading	

U. Security and permissions

ID	Test	Steps	Expected	Result
U1	Role boundaries	Repeat A3 to A6 by typing edit and action addresses directly	Every forbidden action refused (403), not just hidden	
U2	Files	Copy a document link; open it in a private window	Sign-in required	
U3	Uploads	Upload an .exe renamed .pdf, and a file over the upload size limit	Both refused with a clear message	
U4	Confidential data	As Contributor open a case with confidential notes; check DM-S09 in open data	Notes hidden; DM-S09 never published	
U5	Session	Leave a session idle beyond the timeout; sign out and press Back	Asked to sign in again	
U6	Passwords	Set a short or common password	Refused	
U7	Behind HTTPS (IT)	On the hosted test server (HTTPS proxy, `BEHIND_HTTPS_PROXY=True`, `SECURE_COOKIES=True`, `https://` `PHAEMA_BASE_URL`): sign in, save a property, sign out	All work; no "Forbidden (403) CSRF" message; the browser shows the session cookie as Secure	
U8	Plain HTTP refused (IT)	On the same server open the `http://` address	Redirected to `https://` by the proxy; the app port 8000 cannot be reached from outside	
U9	API and two-step sign-in	Call the API with the username and password of an account that uses two-step sign-in	Refused	
U10	Reset link limits	Ask for a password reset for the same account six times within an hour	No more than three emails arrive; the sixth request shows a Too many requests message	

V. Browsers and devices

ID	Test	Steps	Expected	Result
V1	Desktop browsers	Run B, C2, G7 and K1 in Edge, Chrome, Firefox and Safari	Same behaviour in each	
V2	Phone	On a phone open My work, Whole estate, Properties, a property, the map and Hand over work	The page never scrolls sideways; wide tables scroll inside their own box; menu and setting links are easy to tap	
V3	Print	Print a case, a property and a tenant statement	Clean print without menus; hidden panels printed	

W. Performance

ID	Test	Steps	Expected	Result
W1	Page speed	Time the dashboard, property list, map and a large report	Each under 3 seconds on the hosting server	
W2	Large download	Download the change log and rent schedule to Excel	Completes; every row included	
W3	Several users	Five testers use the system at once for 15 minutes	No errors or noticeable slowdown	

X. Regression and sign-off

ID	Test	Steps	Expected	Result
X1	Retest	Rerun every test that failed, after its fix	Passes	
X2	Automated suite (IT)	Run `python3 -m pytest` on the final build	All tests pass	
X3	Fresh install (IT)	Install from the installation guide (week 8) on a clean server; load the demo data	Works first time following the guide only	

Y. Hand over work

Run these last: they move the demonstration surveyors' work, which earlier tests rely on. Sign in as an Administrator. Lena Chen, Rob Baker and Sam Hughes are demonstration users; you need no password for them. When finished, reset the demo data (Y9).

ID	Test	Steps	Expected	Result
Y1	Who can use it	As Surveyor and as Viewer, look for Hand over work in the menu, then type `/people/hand-over/`	Not in their menu; the address is refused (403)	
Y2	What a person holds	Hand over work; from Lena Chen; Show their work	19 properties, 19 open cases, 96 case tasks, 24 lease events, 3 maintenance jobs; a note that she is also an internal valuer	
Y3	Part of a patch	From Lena Chen, give it to Rob Baker, only work on DM-N01-B01 Hangar block; Show their work, then Hand over work	Counts first show 6 properties, 5 cases, 29 tasks, 10 lease events, 1 job; staff row says not moved; after, those move to Rob and Lena keeps 13 properties	
Y4	Different people per kind	From Lena Chen: properties to Rob Baker, open cases to Sam Hughes, tasks left with Lena	A moved case shows Sam as owner; its tasks still show Lena; her properties show Rob as managing surveyor	
Y5	Approvals and staff	From Sam Hughes, everything to your own account	2 case approvals, 2 works orders and 5 staff move; you are emailed about each case approval (or it appears in the log); the five surveyors' user records show you as supervisor	

ID	Test	Steps	Expected	Result
Y6	A leaver	From Lena Chen, give it to Rob Baker, tick Also stop signing in; Hand over work	Success message lists what moved; every count for Lena is now 0; her user record is no longer Active	
Y7	Change log	Changes, filtered by your name	Each moved property, case, task, event and job is listed, with the old and new person	
Y8	Who can receive	From any surveyor, open each Give to list	Viewers never appear; the Contributor (Jo Patel) appears only for open cases they contribute to	
Y9	Reset (IT)	`./phaema.sh demo-data --reset`	Lena Chen's counts are back to those in Y2	

Z. Access areas and cover

Run these on day 11 with the other cross-cutting tests. Use the demonstration staff: Lena Chen and Rob Baker (Estates, Maintenance and compliance, Valuation), Sam Hughes (their supervisor), Dana Okafor (finance officer: Surveyor role, Finance area) and Jo Patel (Legal). Sign in as an Administrator to change areas; the others have no password, so test what they see by giving your own test accounts the same areas.

ID	Test	Steps	Expected	Result
Z1	Standard areas	Manage data, Access areas	Estates, Finance, Maintenance and compliance, Valuation and Legal, with the modules shown	
Z2	Module refused	Give a Surveyor test account only Legal; open the menu, then type `/maintenance/jobs/` and `/rents/`	Buildings and Income menus gone; both addresses show "You do not have access"	
Z3	Module opened	Add that account to Maintenance and compliance	Maintenance and compliance open; rents still refused	

ID	Test	Steps	Expected	Result
Z4	Own patch	Give the account Estates and make it managing surveyor of DM-N01; open Rents, Arrears and a DM-N01 lease, then a lease elsewhere	Rents says "Showing rent for your patch"; arrears list only DM-N01 leases; the other lease has no rent panel and its account address is refused	
Z5	Whole chain	Make your account the supervisor of Sam Hughes; open Rents	Lena Chen's and Rob Baker's tenants now appear	
Z6	Cover	As Sam's supervisor, select Arrange cover for absence on My work and look at Who is away. Then, as Administrator, arrange cover for Lena Chen by another test account from today until tomorrow, and later select End now	Only people in your chain are offered to supervisors; the covering account sees Lena's arrears; End now removes it	
Z7	Finance officer	Give a Surveyor account only Finance; open Rents, Raise rent, Finance exports, Import	All open; Import shows only receipts and service charge spending; Compliance refused	
Z8	Finance viewer	Give a Viewer account Finance	Can see arrears and accounts; Raise rent and Import refused	
Z9	Reports and change log	As the Z2 account, open Reports and Changes; try `/reports/new/?dataset=charges`	No rent, maintenance or compliance reports; no changes to charges or jobs listed; the address is refused	
Z10	Approvals and hand-over	Remove Maintenance from a supervisor, then ask them to approve a large works order; open Hand over work for a surveyor	The order is refused with a message naming the supervisor; maintenance jobs can only go to people with Maintenance	

ID	Test	Steps	Expected	Result
Z11	Change log	Changes, filtered by your name	Area changes and cover appear with who, when and what	

Defect log and sign-off

Log each failure here or as a GitHub issue labelled `testing`, newest first.
